The best selling auto detailing extractor in the world.

The Grand Prix™ has been setting the standard in the detailing industry for years. Since its introduction, it has steadily grown to be #1 in both market share and in quality. Professionals nationwide appreciate its value to their business. Why? It features the power of a dual cord unit, with the convenience of a single power cord. Our exclusive in-line heating technology give you hot water where you need, when you need it. The powerful vacuum helps you finish the job quickly. This machine makes express detailing a reality.

PERFORMANCE

A 1200 watt in-line heater provides hot water, ensuring that grease and dirt are broken up quickly.

CONVENIENCE & SAFETY

The HP100's single 25' extension cord is easy to handle, so that it will not become a trip hazard. The machine also features waist high connections and controls, to eliminate bending for access.

DURABILITY

Designed for heavy, continuous use over time, the HP100 contains a durable 100 PSI pump, as well as a powerful three-stage vacuum motor.

EFFICIENCY

The HP100 is so efficient it can maintain heat and water lift comparable to most of our competitor's dual cord units.

VERSATILITY

Add our optional drying kit for drying the interior and exterior of vehicles. With the optional AutoVac attachment, the unit can be used as a wet/dry vacuum. Add a floor wand, and now the unit can be used for carpet cleaning as well.

- 1 EASY OPEN LID
