<b>Dimensions</b>	29" x 18" x 37"

### **Big engine, small chassis.**

The Spyder is the perfect machine for the mobile professional. Half the size of most other machines, but all the power! It features comparable operating specifications to our largest units, and rivals any of our competitors full size units in performance. Perfect for situations where space is limited. Easy transport, easy to store, even easier on the budget. More power than you'd expect from a unit this affordable.

### **BENEFITS**

Designed for heavy, continuous use over time, the HP60 contains a durable 100 PSI pump, as well as a powerful three-stage vacuum motor.

### **CONVENIENCE & SAFETY**

The HP60's single 25' extension cord is easy to handle.

### **EFFICIENCY**

The HP60 is so efficient it can maintain heat and water lift comparable to most of our competitor's dual cord units.

### **PERFORMANCE**

A 1200 watt in-line heater provides hot water, ensuring that grease and dirt are broken up quickly.

### **VERSATILITY**

Add our optional drying kit for drying the interior and exterior of vehicles. With the optional AutoVac attachment, the unit can be used as a wet/dry vacuum. Add a floor wand, and now the unit can be used for carpet cleaning as well.

- 1 EASY OPEN LID
- 2 OPERATING INSTRUCTIONS ON BOARD
- 3 SWIVEL CASTERS
- 4 STAINLESS STEEL UPHOLSTERY TOOL
- 5 15' VACUUM/SOLUTION HOSE
